ABOUT ME

I'm Beka Merebashvili, a 24-year-old junior React developer passionate about web development. I specialize in creating dynamic, user-friendly websites that meet client and user needs. With strong communication skills, I excel in collaborating with cross-functional teams.

EXPERIENCE/ PROJECTS

[Crypto table](#) - Users have the opportunity to identify cost-effective platforms for purchasing Bitcoin.

I've leveraged **React**, **Typescript**, **Tailwind CSS**, and **REST API** in developing the application. - [Live URL](#)

[Github user search app](#) - This application enables the retrieval and display of profile data for any registered GitHub user, enhancing accessibility to diverse user information.

I employed **React**, **Typescript**, **REST API**, and **Styled Components** in the development of this application. - [Live URL](#)

[Food app](#) - Experience a user-friendly application allowing seamless filtering of dishes by categories and prices.

I employed **React**, **Typescript**, and **Tailwind CSS** in the development of this application. - [Live URL](#)

[Interactive card details form](#) - Explore an impeccably designed bank card data form integrated with comprehensive validations, ensuring a secure and seamless user experience.

I employed **React**, **React hook form**, **Input-mask** and **Styled Components** in the development of this application. - [Live URL](#)

You can see all projects on my [GitHub](#) page.
